

MondoTalk Wholesale Guide - How to Configure RURI

Overview: RURI allows to you to identify the called DID in SIP account. This is extremely useful if there are multiple DIDs in one account. This will allow you to create a separate dial plan in your PBX for each DID.

1. Go to portal.mondotalk.com and log in using your parent account details

2. Go to accounts >> Phone numbers.

3. The list of your phone numbers (DIDs) will appear, select the number you wish to configure RURI for.
4. From the new tab, enter the number itself in the RURI tab using E-164 format ie 61399997777.
