

## MondoTalk - Yealink W52P Setup and Manual Registration

1. Connect your router with the supplied Ethernet network cable to the ethernet port found on the Yealink's base station. Then plug the supplied power cable into the base station.

Wait 60 seconds after plugging the base station's power adapter.

After 60 seconds press the Paging button located on the face of the base station, as indicated by the screenshot below:

Once pressed, the IP address of the base station should be displayed on the handset, as indicated below

We will now login to your device's web configuration interface. Enter the displayed IP address into your favorite browser. You should now see a page that looks like this:

	·	
assword	1	

Enter the system username/ password on the given field. The default system credentials should be **admin** for both the username and the password.

2. Click on the **Account** tab. You'll now be taken to the Account configuration page as shown above
